

**Materials** 316L Stainless Steel  
**Pressure** 100 Bar  
**Ports** 1/4" or 1/2"  
**Element** 25.64.□  
**Membrane** MT.61.□

SM215 combination housings have a coalescing filter element and a PTFE membrane in a single unit.

The porous PTFE membrane is supported by a sintered porous stainless steel disc on the outlet side. The wet sample gas enters through the inlet port and through the coalescing element to remove the bulk of the liquid and solid particles and then to the membrane. Any liquid in the gas sample will flow to the drain port. This port can also be used as a bypass function for the main flow.

Standard housings have NPT ports and include Viton seals. Other seal types are available as an option. BSPT and BSPP port types are also available.

The housings are free from welds and comply with NACE MR-01-75.

## Technical Specifications

Housing Model	SM215.221	SM215.421
Port Size	1/4" NPT	1/2" NPT
Drain & Bypass Ports	1/4" NPT	1/4" NPT
Maximum Pressure, Bar	100	100
Maximum Temperature, °C (1)	150	150
<b>Materials of Construction (2)</b>		
Head, Bowl & Internals	316L SS	316L SS
Seals (3)	Viton	Viton
Membrane Code (4)	25.64.□	25.64.□
<b>Principal Dimensions in mm</b>	MT.61.□	MT.61.□
Diameter		
Height	75	75
Volume, cc	169	169
Weight, kg	135	135
<b>Accessories</b>	2.8	2.8
Mounting Bracket	MBSM215	MBSM215

### Notes

- (1) Maximum temperature of 150°C is due to the PTFE membrane
- (2) Material abbreviations, 316L SS = 316L Stainless Steel
- (3) Add suffix for other seal types, PTFE = .T, Chemraz = .C, Nitrile = N, Kalrez = .K, EPDM = .E, Silicone = .S, (e.g. SM215.221.T)
- (4) Replace the □ with the element grade required, e.g. 25.64.5CK
- (5) Replace the □ with the membrane grade required, e.g. MT.61.M2
